Why Open Systems

Hybrid SASE

Being on the forefront of **converging network and security services**, we've always focused on tight integration of technologies into one holistic solution.

No matter where you are today, we are supporting you on your **digital transformation journey**.

Unified functionality

The transport-, provider- and cloud-**agnostic platform** ensures agility to meet the demand of today's businesses while reducing operational complexity and cost.

Built-in functionalities ranging from SD-WAN to Extended Detection and Response are **managed end-to-end**.

Customer experience

With more than 30 years in the business, Open Systems has a **proven track-record, industry-best NPS**, technology awards, established partners and many happy customers.

With **continuous technology and service innovation** we're ensuring your success for the next 30 years as well.

Gold

Microsoft
Partner

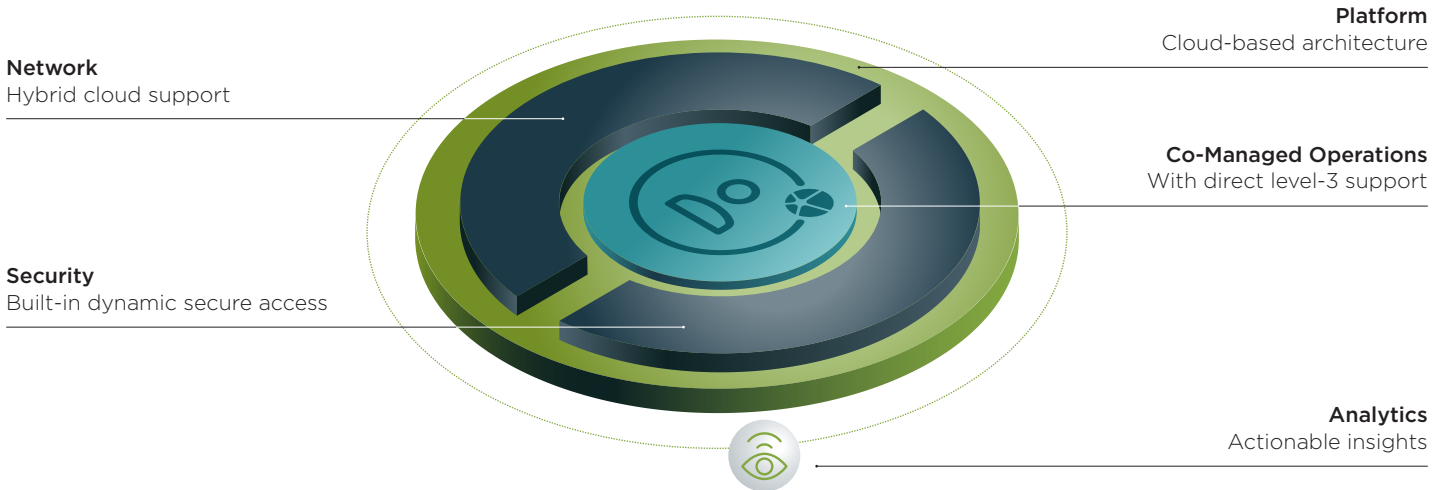

EQUINIX

Established global alliances

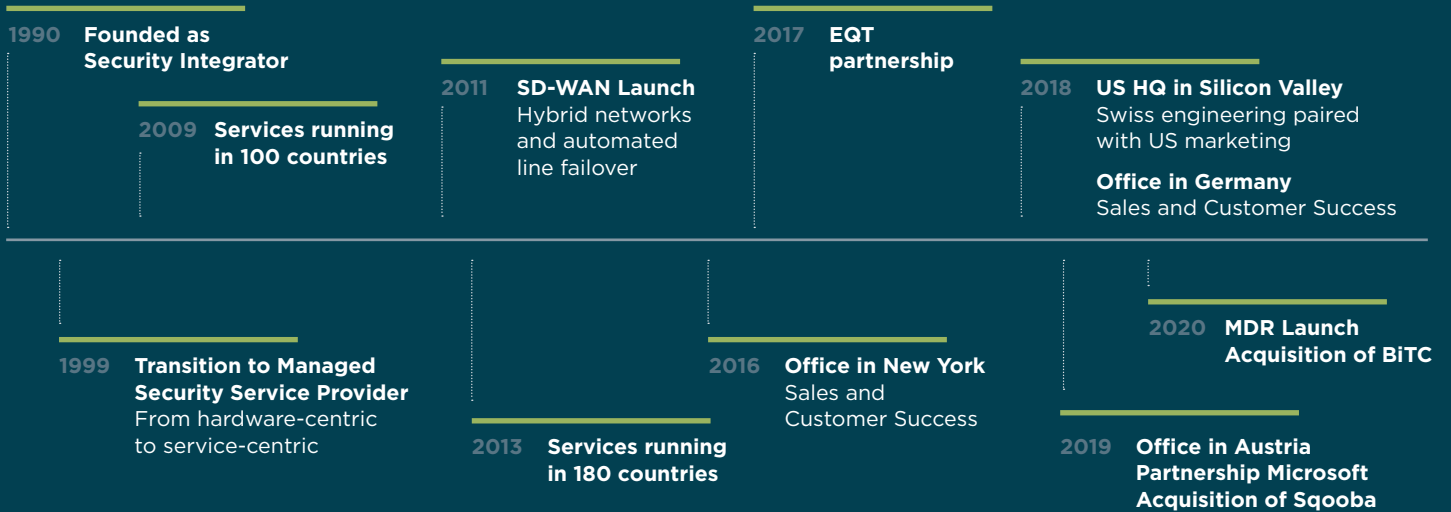

As a Microsoft Gold Partner, we offer technical expertise for Microsoft Azure security services and cloud platform. Together with Equinix, we enable our customers to succeed with their multi-cloud strategy.

Open Systems Platform

Open Systems enables customers to leverage a single partner for network and security operations. Consolidate your SD-WAN, network security, and extended detection and response (XDR) technology to reduce complexity and the need to orchestrate multiple vendors and applications. Open Systems helps free up your skilled IT staff to work on other business-critical projects.

30+ years of Managed Services experience

CLAAS

“We solved problems in a very team-oriented way. It’s the technical expertise but also the culture, why we have chosen Open Systems. And, of course, it’s also the quality of the solution.”

Bernhard Schuchert
Chief Information Officer

Swiss Re

“The design for the Zurich location was completed in two days. After a further eight days, everything was installed, commissioned and tested. I have never experienced anything like it in my 20 years in the industry.”

Risto Wieland
Director IT

UBS

“We join forces with the Security Engineers at Open Systems in constantly seeking to improve methods and to introduce new processes and mechanisms so that we can improve our success rate even further.”

Markus Lickert
Managing Director

Chemours™

“We were looking for people that were competent, experienced, fast, efficient.”

Rocco Boccuti
IT Business Director

KEMET

“They’re monitoring our environment proactively. So a lot of times they will tell us, <Hey, we fixed this.> – And we didn’t even know there was a problem.”

Chris Hall
VP of Global Information Technology
