EQUINIX

BENEFIT FROM OUR **GLOBAL ALLIANCES**

We add a layer of professional services and 24x7 SOC and NOC monitoring across the combined solution and help manage it from the cloud.

As a six-time Microsoft Gold Partner, we offer technical expertise for Microsoft Azure security services, cloud platforms, and other Microsoft products. Together with Equinix, we enable our customers to succeed with their multi-cloud strategy.

ASK OUR **CUSTOMERS**

"Open Systems' strength is that they evolve the service by listening to our needs, which in turn helps Sika serve our customers. We feel very confident that we are in good hands with Open Systems, now and into the future."

Jürg Siegenthaler
Team Head Network and Server at Sika

"With the Open Systems solution, we no longer need to be in the tactical day-to-day security business."

Mugunth Vaithylingam
CdxO at College of Southern Nevada

"When it comes to security, we need partners to provide that end-to-end solution for our customers. And that's exactly what the partnership with Open Systems brings for our customers."

Mandana Javaheri
Global Director, Security Partner Development, at Microsoft

Open systems

Open Systems is a groundbreaking cybersecurity company delivering an experience way beyond expectations. Our obsessive care for our clients' businesses has led us to reinvent how cybersecurity is delivered to fit today's mobile, cloud-based world. Our team, based in North America, Europe, and Asia, consistently provides crazy good cybersecurity to leading organizations all over the world.
